ABOUT

Passionate about programming, full-stack web development, and graphic design, I enjoy turning ideas into practical tech solutions. I've worked on **freelance projects** often through opportunities shared by my cousin, who works at **Fiverr**, allowing me to collaborate with diverse clients and improve my technical and creative skills. With strong problem-solving abilities, a creative mindset, and a love for teamwork, I'm always eager to learn, grow, and contribute to impactful projects.

WORK EXPERIENCE

Library Management System
Technologies: Java
- A desktop application for managing book inventories, member registration, issuing and returning books, and tracking overdue records.

Hospital Management System (Webpage)
Technologies: HTML, CSS, JavaScript
- A front-end design for managing hospital-related information, including patient intake forms and department navigation.

UX/UI Design of a Ride Booking App
Technologies: React Native
- Designed a modern user interface for a mobile app that allows users to book rides easily, focusing on user experience and clean design.

Hotel Management System
Technologies: PHP & MySQL
- A project to manage hotel room bookings, guest details, billing, and staff assignments. Included scheduling and resource allocation features.
